

OJASWI BHARDWAJ

+91-7840089727 | ojaswideep2020@gmail.com | LinkedIn | GitHub | Portfolio | Leetcode

PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate with a strong algorithmic problem-solving foundation (250+ LeetCode) and hands-on experience building full-stack products with ReactJS, NodeJS, and Production Grade AI technologies. Skilled in AI/LLM integration across Gemini, OpenAI, and Claude APIs, dashboard development, Data Analytics, real-time systems, and scalable backend platforms.

TECHNICAL SKILLS

- Frontend & Frameworks:** ReactJS, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Mermaid.js, HTML/CSS
- Backend & Runtime:** Node.js, Express, Python, Django REST Framework, RESTful APIs, GraphQL
- AI & LLMs:** LangChain, LangGraph, Google Genkit, OpenAI API, Gemini API, Claude API, LiveKit, Prompt Engineering
- Databases & Caching:** PostgreSQL, MongoDB, Redis, MySQL, Mongoose, ORM
- Cloud & DevOps:** AWS, Docker, CI/CD, GitHub Actions, Linux/Bash, Git, BitBucket
- Real-time & Protocols:** WebSockets, Socket.io, WebRTC, STUN/TURN
- Systems & Architecture:** Microservices, Scalability, Fault Tolerance, Concurrency, Async Processing, System Design

COMPETITIVE PROGRAMMING

- LeetCode:** 250+ problems solved across arrays, trees, graphs, and dynamic programming
- Contest rating: 1357 (peak 1400+), actively improving

PROFESSIONAL EXPERIENCE

Grazitti Interactive

Jun 2025 – Nov 2025

Software Engineer Intern

- Refactored core Java modules by eliminating redundant logic paths, improving execution efficiency by **25%**.
- Designed an automated table allocation engine using **Factory** and **Singleton** design patterns, achieving **90% logic accuracy** and removing manual processing during stress-testing.
- Diagnosed legacy scheduling failures through log inspection and shell scripting; ranked in the **top 10%** of trainees on performance metrics.

PROJECTS

LuminaQuant — AI-Powered Investment Research Platform

May 2026 – Jun 2026

React, Node.js, TypeScript, LangChain, LangGraph, OpenAI API, Gemini API, PostgreSQL, Docker

GitHub Live Demo

- Engineered an AI investment research agent using LangChain/LangGraph for multi-step reasoning, portfolio risk analysis, and real-time market data synthesis powered by production-grade LLMs (OpenAI/Gemini).
- Designed a React frontend dashboard for visualizing portfolio metrics, AI-generated risk assessments, and historical trend analytics with interactive data visualizations.
- Built a scalable Node.js backend with structured agent workflows, tool calling for live market data, persistent conversation memory, and PostgreSQL for storing user portfolios and agent interaction logs.

Live Audio Notes (EchoReader) — AI-Powered Reading Companion

Apr 2026 – May 2026

Kotlin, Jetpack Compose, Node.js, Express, Groq API, Room (SQLite), Retrofit, Moshi, Coroutines, SpeechRecognizer, TextToSpeech

GitHub

- Built EchoReader, a full-stack AI reading companion with Kotlin/Jetpack Compose and Node.js/Express, integrating production-grade LLMs (Groq/Gemini) to generate summaries, flashcards, quizzes, and vocabulary in real time.
- Engineered a JSON-schema LLM pipeline with local prompt compression and NodeCache caching (2-hour TTL), cutting redundant API calls by **~40%** while stabilizing AI-generated study outputs.
- Designed Room (SQLite) entities for BookSession, TextChunk, and StudyCard with foreign-key relationships, enabling offline-first reading sessions, progress tracking, and mastery-based leaderboard learning.
- Integrated SpeechRecognizer, TextToSpeech, PDF export, and Retrofit/OkHttp with Moshi for hands-free AI audio feedback and type-safe Android-to-Node.js communication.

Drift Seeker - DevOps Monitoring & Analytics Dashboard

Mar 2026 – May 2026

Next.js 16, React 19, TypeScript, Node.js, MongoDB, Redis, Socket.io, NextAuth, GitHub Actions

GitHub Live Demo

- Architected a production-grade monitoring dashboard with Next.js 16 and React 19, featuring real-time URL uptime checks, diagnostic timing traces (DNS/TCP/TLS/TTFB), and automated failure alerts via Nodemailer.
- Implemented a 24/7 monitoring workflow with Redis caching (HSET/HGETALL) for sub-second latency reads and MongoDB as the persistent source of truth for monitor CRUD operations.
- Built an A/B stress testing pipeline using GitHub Actions workflow dispatch, with benchmark metrics posted to a REST API and visualized in the dashboard for data-driven performance analytics.

ArchiText — AI System Design & Architecture Platform

Feb 2026 – Mar 2026

Next.js, TypeScript, React, Google Genkit (Gemini), shadcn/ui, Mermaid.js, Azure APIs

GitHub

- Created an AI-driven architecture assistant using Next.js, TypeScript, and Google Genkit (Gemini) to automate cloud infrastructure planning, reducing system design time from days to hours.
- Implemented a multi-agent backend framework for architectural generation, tradeoff analysis, and Azure cloud cost estimation with structured LLM prompt templating for consistent, reliable output.
- Built an interactive React dashboard with Mermaid.js diagram rendering and shadcn/ui components for real-time architecture visualization and collaborative design reviews.

EDUCATION

Lovely Professional University, Punjab

Aug 2023 – Present

B.Tech in Computer Science and Engineering

CGPA: 7.5

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** May, 2026
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate** May, 2026
